Agenda

Understanding K8s
Workloads Using
Octant

About Me

Brief Overview of Octant

Create and Explore a Workload

Q & A

Wayne Witzel III
Octant Maintainer, VMware
@wwitzel3

Wayne lives in Durham, NC on an 18-acre farm with his wife Jessa. Together they have 3 goats, 7 ducks, 50 chickens, 2 cats, and 1 dog.

Wayne has worked in open source tools for some time and was previously at RedHat working on Ansible Tower, Canonical working on Juju, and SourceForge working on Allura.

Currently Wayne is a software engineer for VMware working on the Octant project.

Highly extensible platform for developers to better understand the complexity of Kubernetes clusters.
