Integrating multi-location ADC with Prometheus and Grafana

Dave Blakey
Snapt

NOVA
community edition

What is an ADC?

- Load Balancer — *this you all know!*
- Web Accelerator
- Web App Firewall
- Telemetry — *today's focus*

NOVA
community edition

Deploy, scale, securely manage and observe any number of ADC's across multiple locations and environments.

In cloud-native, what are we getting?

- Availability
- Performance
- Security
- Observability

NOVA
community edition

Today's Demo

- Quick setup of an ADC *on Nova*
- Enabling Prometheus on Nova Nodes
- Collecting Data in Prometheus
- Reporting with Grafana
- Q&A *at the end*
