

How to migrate NF or VNF to CNF without vendor lock-in

WEBINAR 20.10.2020

CLOUD NATIVE
COMPUTING FOUNDATION

AGENDA

1. Today's speakers
2. Market and technology drivers 2020+
3. Step by step migration to CNF - LIVE DEMO
4. Q/A

TODAY'S SPEAKERS

GREG SIKORA

- Open Source evangelist in TELCO
- Ultramarathon runner
- Telecom and cloud expert with 20+ years exp.
- Blockchain addicted enthusiast

RAFAL MYSLIWIEC

- Swiss knife of messaging
- Experienced Software engineer
- Expert in legacy protocols
- Best optimization specialist

PAWEL KULPA

- Master chef of cloudification
- Experienced Software engineer
- Cloud Automation expert

WHAT WE DO BEST

CLOUD

- Cloud transformation
- Cloud Native design, implementation and deployment
- Automatization
- Containers Kubernetes

kubernetes

CHEF

Terraform

openstack™

ANSIBLE

TELCO

- Signalization area
- Billing & rating area
- Provisioning and mediation area

OCS

PrePaid CC

TAS

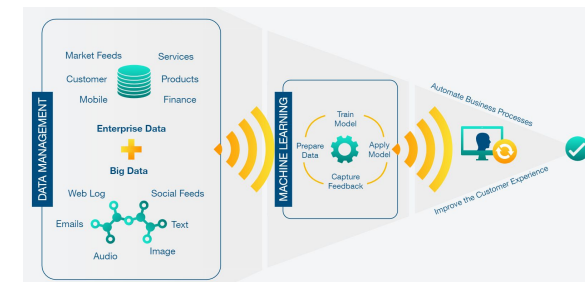

Service Broker

Convergent
Messaging GW

OTHER

- Blockchain
- AI/ML

OPEN SOURCE COOKING

"We love open source because it gives us the freedom to cook delicious dishes using the best ingredients"

Dominik Skrobacz
Co-owner at OVOO

NF EVOLUTION TO THE CLOUD

- Application Server based service => cloud native apps
- Monolithic => Microservices
- Containers for automated deployment and DevOps
- Container orchestration for scalability and management

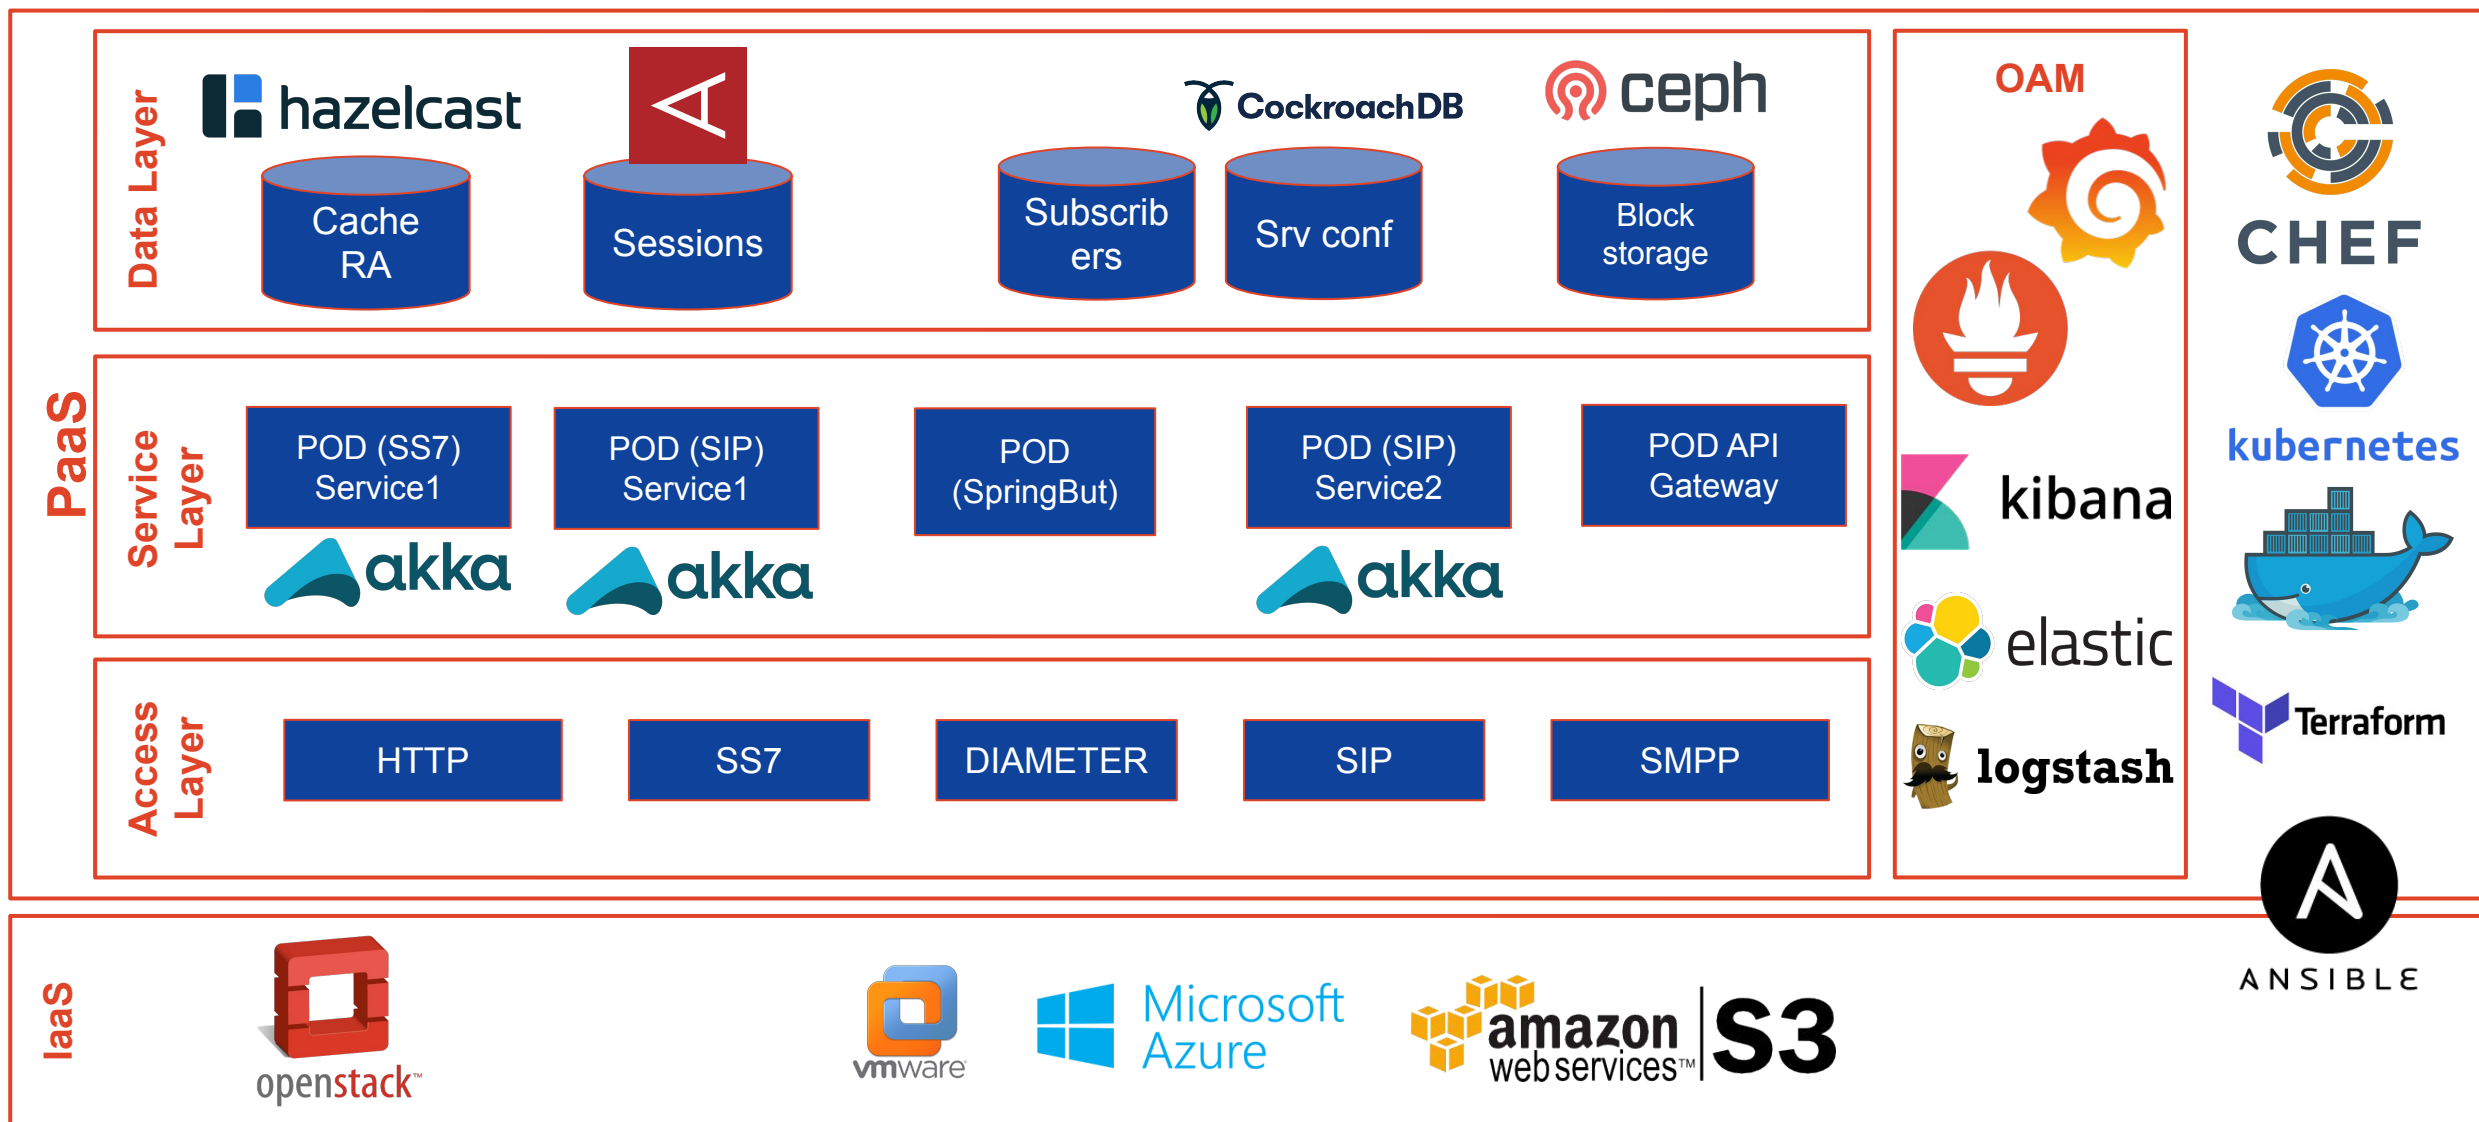

Well known issues with legacy deployments

1. Lack of services separation
2. Monolithic big application
3. Heavy regression testing
4. Complicated deployment procedure
5. Heavy acceptance tests
6. Limited automatic scalability

Cloud native apps - architecture blueprint

LIVE DEMO

STEP BY STEP MIGRATION TO CNF

Key features and benefits

Why to migrate to CNF?

- Cost effectiveness - migration to be spread over time
- IPRs ownership for the business logic - no vendor lock-in
- No royalty - no need to buy expensive licenses and subscriptions
- The Service Provider can contribute to open source development

Q & A
