

LENS
The Kubernetes IDE

Take the pain out of multi-cluster Kubernetes with Lens

About Me

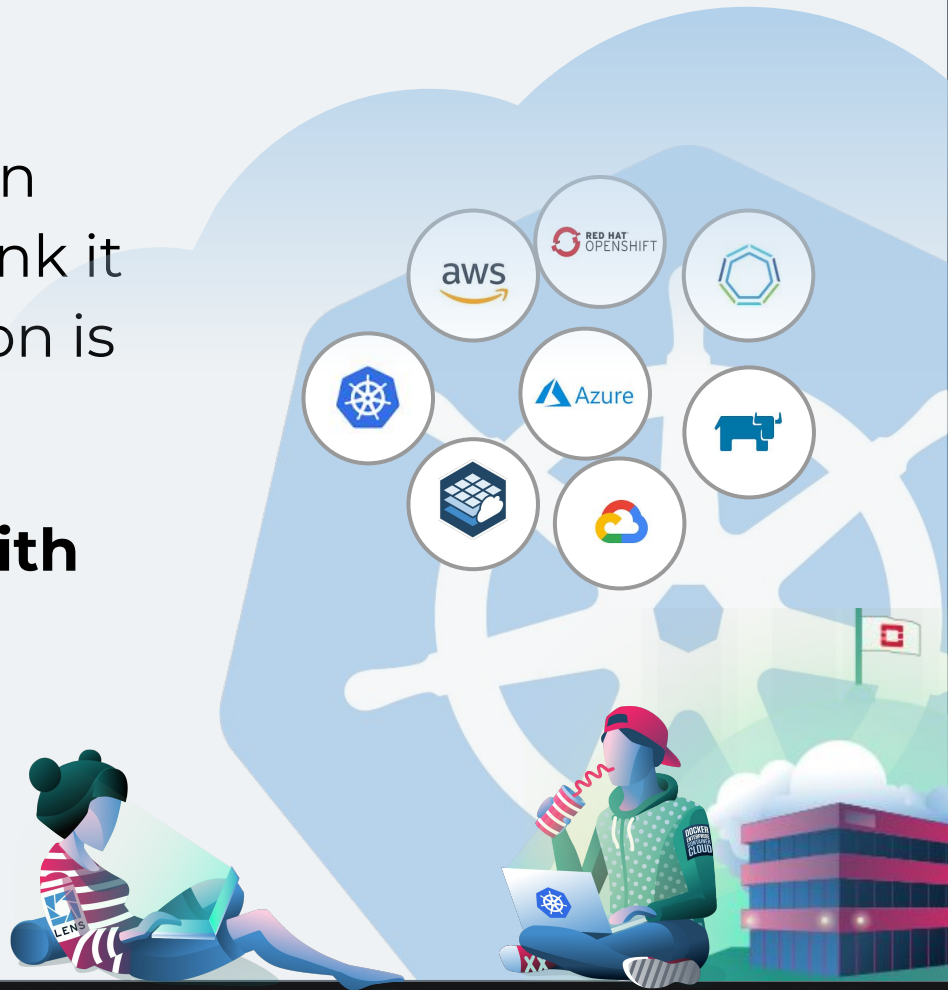

What do I do?

- Responsible for developer relations at Mirantis
- Seek out pain points within Kubernetes to help streamline developer and operator initiatives

Kubernetes Challenge

People & organizations invest in Kubernetes but developers think it is too complicated and adoption is slow

You are not seeing the ROI with containers that you should

Hello, Lens!

Lens is a developer-friendly desktop application for all your kubernetes platforms *It's 100% Open Source*

It allows developers to easily onboard and operate their applications in kubernetes **improving productivity and increasing ROI**

LENS

The World's Most Popular Kubernetes IDE
