

Conference Transparency Report:

KubeCon + CloudNativeCon + Open Source Summit China 2021 - Virtual

December 9 + 10

KubeCon

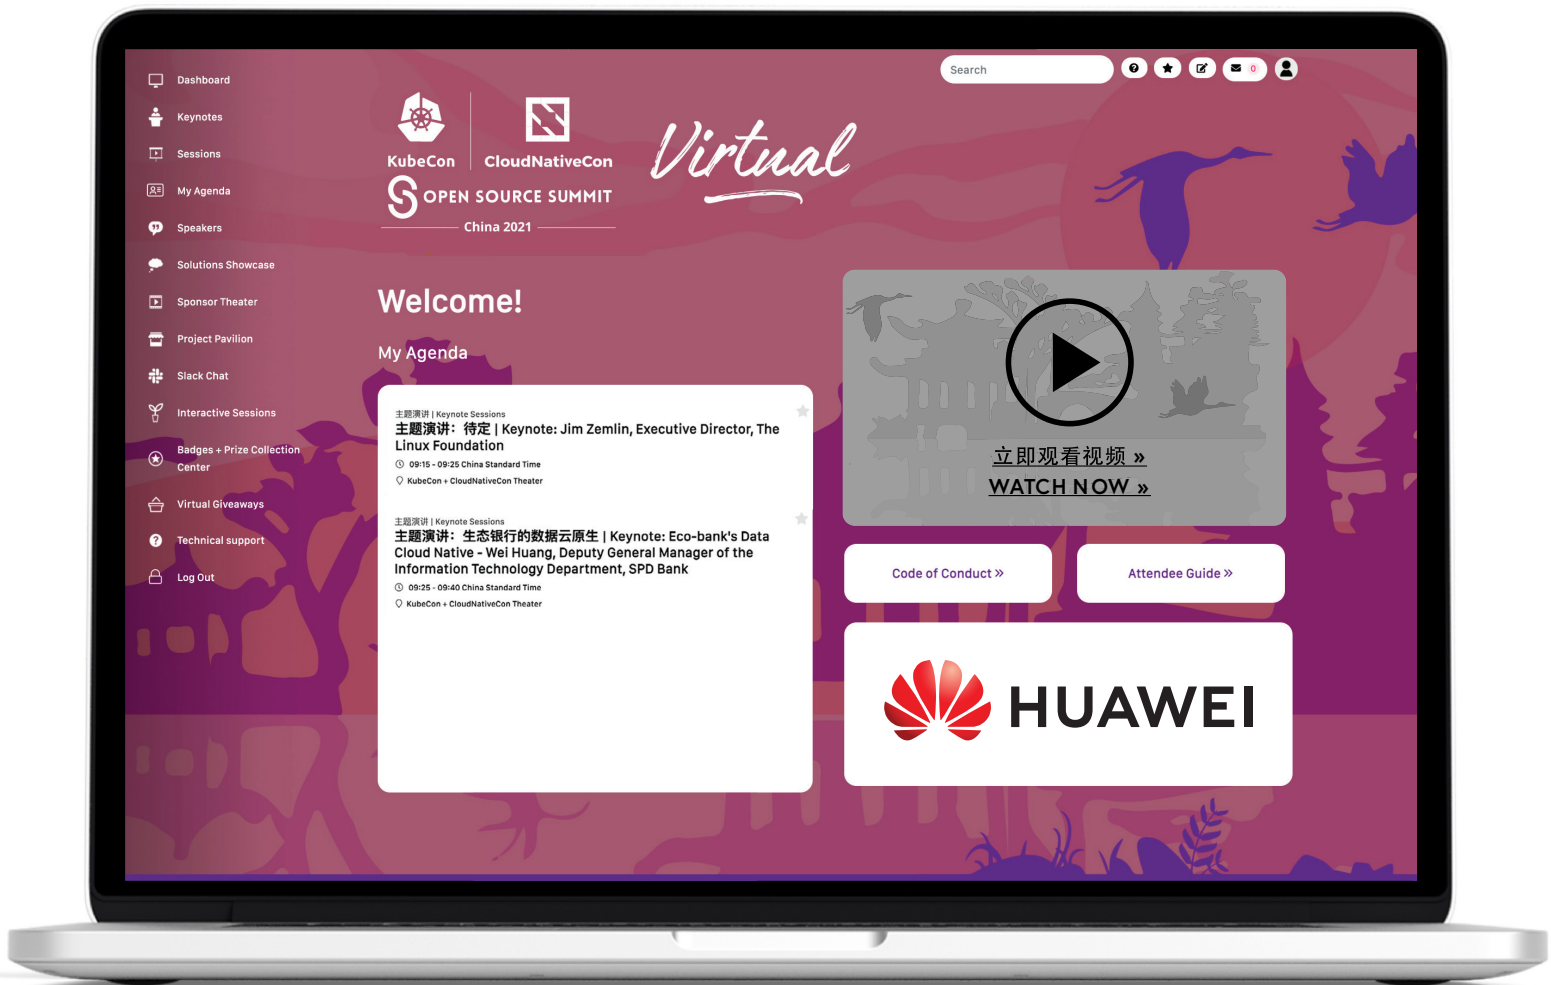

CloudNativeCon

OPEN SOURCE SUMMIT

China 2021

Virtual

As the first virtual KubeCon + CloudNativeCon + Open Source Summit China, the conference brought together 7,160 registrants. Eighty-three percent were first-time KubeCon + CloudNativeCon + Open Source Summit attendees. Feedback from attendees was positive, with 88% of respondents rating the event "good," "very good," or "excellent". The top two reasons respondents cited for attending KubeCon + CloudNativeCon + Open Source Summit were career growth/training (41%) and Keynotes (27%).

Content

The event received 355 submissions with an acceptance rate of 19% which resulted in 189 total speakers (includes co-presenters and panelists) for the event. Of the accepted speakers, 24% represented an end user company and 76% a vendor company, numbers that were commensurate with the number of speakers that submitted to the CFP. For keynotes, 13% of speakers were from an end user company and 87% from a vendor company.

The two-day conference offered attendees 114 sessions, including keynotes, breakouts, and maintainer track talks. It also included 6 sponsored talks and one session around diversity and inclusion initiatives. From feedback received via Sched.com, attendees gave an average session rating of 10 out of 10.

The schedule was curated by the conference co-chairs, Jasmine James of Twitter and Ricardo Rocha of CERN. Jasmine and Ricardo selected 48 subject matter experts to form the program committee, including project maintainers, active community members, and highly rated presenters from past events. Program committee members registered for the topic areas within their expertise and were randomly assigned a subset of relevant talks for review and rate. Jasmine and Ricardo then selected 21 subject matter experts from the program committee to form the new track chair selection committee. Each topic area was assigned two track chairs to form a short list of talks they recommended to the co-chairs to accept. Based on these short lists, the co-chairs assembled a coherent set of topic tracks and keynotes from the recommendations of the track chairs. We looked to the conference co-chairs, track chairs, and program committee to craft a diverse program that reflected current trends and interests in the cloud native community. (Note: Here are [the scoring guidelines](#) we provided to the program committee. There is not a one-to-one mapping of topic areas to session tracks.)

Keynote talks were selected by the conference co-chairs from a pool of the highest-rated CFP submissions, track chair and community recommendations, bringing thought-provoking speakers to the keynote stage. Keynote speakers included

Priyanka Sharma, CNCF; Jim Zemlin, The Linux Foundation; Wei Huang, SPD Bank; Jian Huang, Huawei Cloud; Yifan Shen, CBC; Kevin Wang, Huawei Cloud; Grace Lian, Intel; Ricardo Rocha, CERN; Lei Zhang, Alibaba Cloud; Sheng Lian, SUSE; Jasmine James, Twitter; Hua Yong, 21vianet; Qi Zhang, Huawei Cloud; Shangguang Wang, Beijing University of Posts and Telecommunications; Li Yi, Alibaba Cloud; Wang Ling, Huatai Securities; Dingping Yuan, VMware; Yike Wang, VMware.

In addition to selected talks and keynotes, the conference included 24 maintainer sessions. These were produced by the maintainers of CNCF-hosted projects, TAGs, Kubernetes TAGs, Working Groups, and User Groups to inform users about the projects, add new adopters, and transition some of them from users to contributors. Sessions in the maintainer track were open to each of CNCF's 42 graduated and incubating projects, the Kubernetes TAGs and working groups, and CNCF TAGs. Each of these groups was given the opportunity to host one 35-minute introduction and one 35-minute deep dive session.

项目展示区 PROJECT PAVILION

The Project Pavilion allows the cloud native community a chance to learn more about the CNCF projects. Join the maintainers of our graduated, incubating and sandbox projects for engaging conversations during their Project Office Hours via Bevy. Miss an office hour? Click on the project's logo below and be taken to direct communication with our Maintainers.

项目展示区提供云原生社区一个更深入地了解CNCF项目的机会。加入我们毕业生、培育、沙盒维护人员项目，通过Bevy在项目办公时间内进行对话。错过了办公时间？请点击下面的项目logo，链接会直接连接您和我们的维护人员进行沟通。

End User

End user organizations are those that use cloud native technologies internally and do not sell cloud native products and services externally. We implemented an End User program, yielding 700+ end user registrations. More data points regarding our end user attendance can be found in the demographics section below.

Project Pavilion + Project Office Hours

The project pavilion + project office hours allow maintainers from CNCF's graduated, incubating and sandbox projects to share with attendees. Twenty-one (21) projects participated in the project pavilion + project office hours. This unique opportunity allows attendees to meet the maintainers, ask questions, and learn about new features.

PR + Marketing

KubeCon + CloudNativeCon + Open Source Summit China 2021 - Virtual saw fairly steady media and analyst interest with more than 45 attending virtually from across the globe. Publications and analyst organizations represented included Forrester, ProgrammableWeb, TechTarget and many others. Media and analyst attendees generated more than 450 articles, blog posts, and press releases full of compelling event news covering CNCF and its members, projects, and sponsors.

Media partnerships with OSChina, The New Stack, and TFIR provided a mix of pre-show articles, social promotion, and live show coverage. Pre-event marketing activities included email marketing, media and analyst relations, organic and paid AdWords, news announcements, promotion to webinar audiences, social media campaigns, sponsor blogs and the CNCF news package.

Conclusion

Thanks to all those that have given their feedback on the event. Despite the continued challenges of the pandemic, we were able to bring our community together and continue to expand our cloud native reach.

We're greatly looking forward to the opportunity to be together again - don't miss us in Valencia, Spain for [KubeCon + CloudNativeCon Europe 2022](#) and in Detroit, Michigan for [KubeCon + CloudNativeCon North America 2022](#)!

Media + Analyst Results

Coverage Snapshot (December 9-16, 2021):

CNCF – 456 mentions in media articles, press releases, and blogs shared 44,940 times across social platforms

Kubernetes – 4,909 mentions in media articles, press releases, and blogs shared 163,380 times across social platforms

KubeCon + CloudNativeCon – 195 mentions in media articles, press releases, and blogs shared 148 times across social platforms

Coverage Synopsis:

More than 40 Chinese and five English-speaking freelance reporters and analysts attended KubeCon + CloudNativeCon + Open Source Summit China 2021 - Virtual.

KubeCon + CloudNativeCon + Open Source Summit China 2021 - Virtual generated over 5,560 mentions in media articles, press releases and blogs between December 9-16 – CNCF with 456 mentions, Kubernetes with 4,909 mentions, and KubeCon + CloudNativeCon with 195 mentions.

Chinese Coverage Snapshot:

OSChina, this event's marketing promotion and PR partner, provided the following Chinese Coverage Snapshot:

- Published a total of 23 articles related to the conference topic
- Baidu search index showed nearly 523,000 related news and content
- Published and reprinted more than 300 online articles in portal, technology, IT and other online media. The total exposure of article push and advertisement placement was 5 million – portal website 1.5 million, technology vertical media 3.5 million, and IT media 500,000.
- The WeChat public account published a total of 118 manuscripts, with a cumulative reading volume of 64,506 and a cumulative 262 likes
- 22 articles were written, 32 posters were produced, and a total of 252 communities were disseminated. The total number of communities covered is about 23+ million.
