

KCD CZECH & SLOVAK 2025

TRANSPARENCY REPORT

FOREWORD

4th year of KCD Czech & Slovak, this time in Bratislava!

Our annual conference rotates between Slovakia and Czechia. This year, we met in Bratislava, Slovakia, on June 5-6, 2025. For the first time, we decided to try an in-person only format, making sure that all the sessions were recorded and made available after the event. And we have to admit, we enjoyed it!

We brought together 265 attendees who engaged with a rich program featuring 41 speakers across 42 different sessions - 33 talks, 3 workshops, 1 panel discussion, and 5 lightning talks.

Let's have a closer look on the details of KCD Czech & Slovak 2025 in this transparency report!

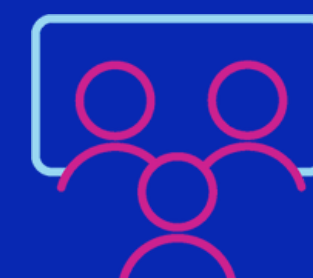

SPEAKERS & SESSIONS

Speakers from Slovakia, Czechia and across the globe shared their expertise on the latest cloud native trends and best practices. This included CNCF project maintainers, CNCF ambassadors and also new speakers. Big Kudos to all of you for your contributions to success of our event!

🌟 Huge thanks to the **KCD Czech & Slovak** community for the warm welcome and the opportunity to share our story! 🙌

Together with my colleague **Marcin Paluszek**, we had the pleasure of presenting "Zero Downtime, Maximum Play: Evolving Game Servers from Bare Metal to K3s" — a journey through how we transformed our game servers architecture to achieve seamless player experiences, modern deployments, and full control with Kubernetes.

Thanks again to everyone who joined the session, asked questions, and shared insights — it was a blast!

#KCD #Kubernetes #GameDev #DevOps #CloudNative #K3s #ConferenceTalk

'Go to conferences', they said. 'Network and learn something new', they said. Nobody mentioned the 3D-Printers half as tall as myself 🤖

Thank you so much for an unforgettable conference, and a nice logistic puzzle for my way home! **KCD Czech & Slovak Prusa Research**

👍❤️🔥 You and 81 others

The different kind of business travel.

This year **KCD Czech & Slovak** is happening in Bratislava.

It was not only a great opportunity to give back to the community by sharing all our secrets and lessons learned on how to build and deploy to customer-controlled environments, but our **Distr.sh** demo also triggered a lot of interest and follow-up conversations.

And being that close (around 60 km) to my hometown, Vienna, this conference was the perfect opportunity to take my road bike for a spin.

Also make sure to follow **Glasskube** to get more insights and tips on how to distribute software to customer controlled environments.

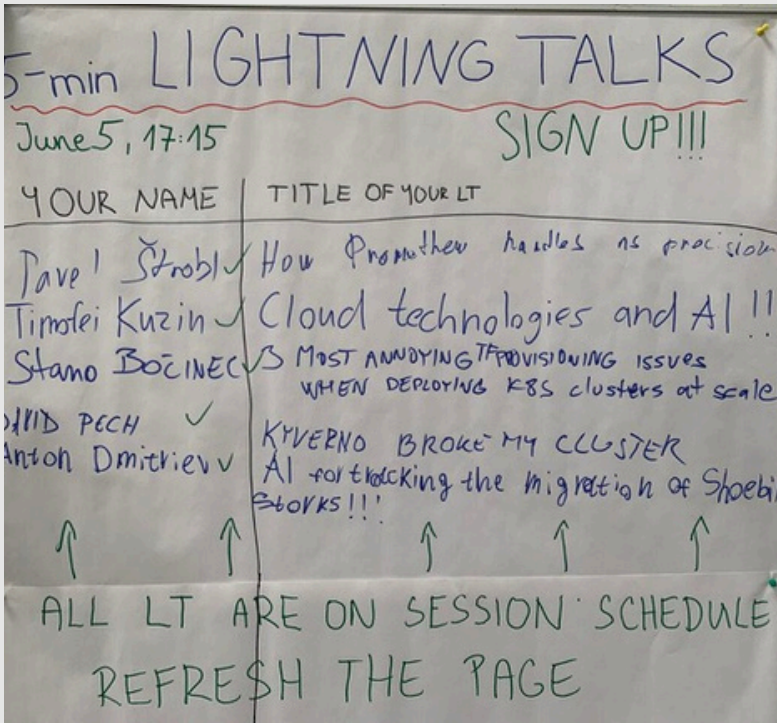

👍❤️🔥 Tomáš Bočinec and 75 others

STATISTICS

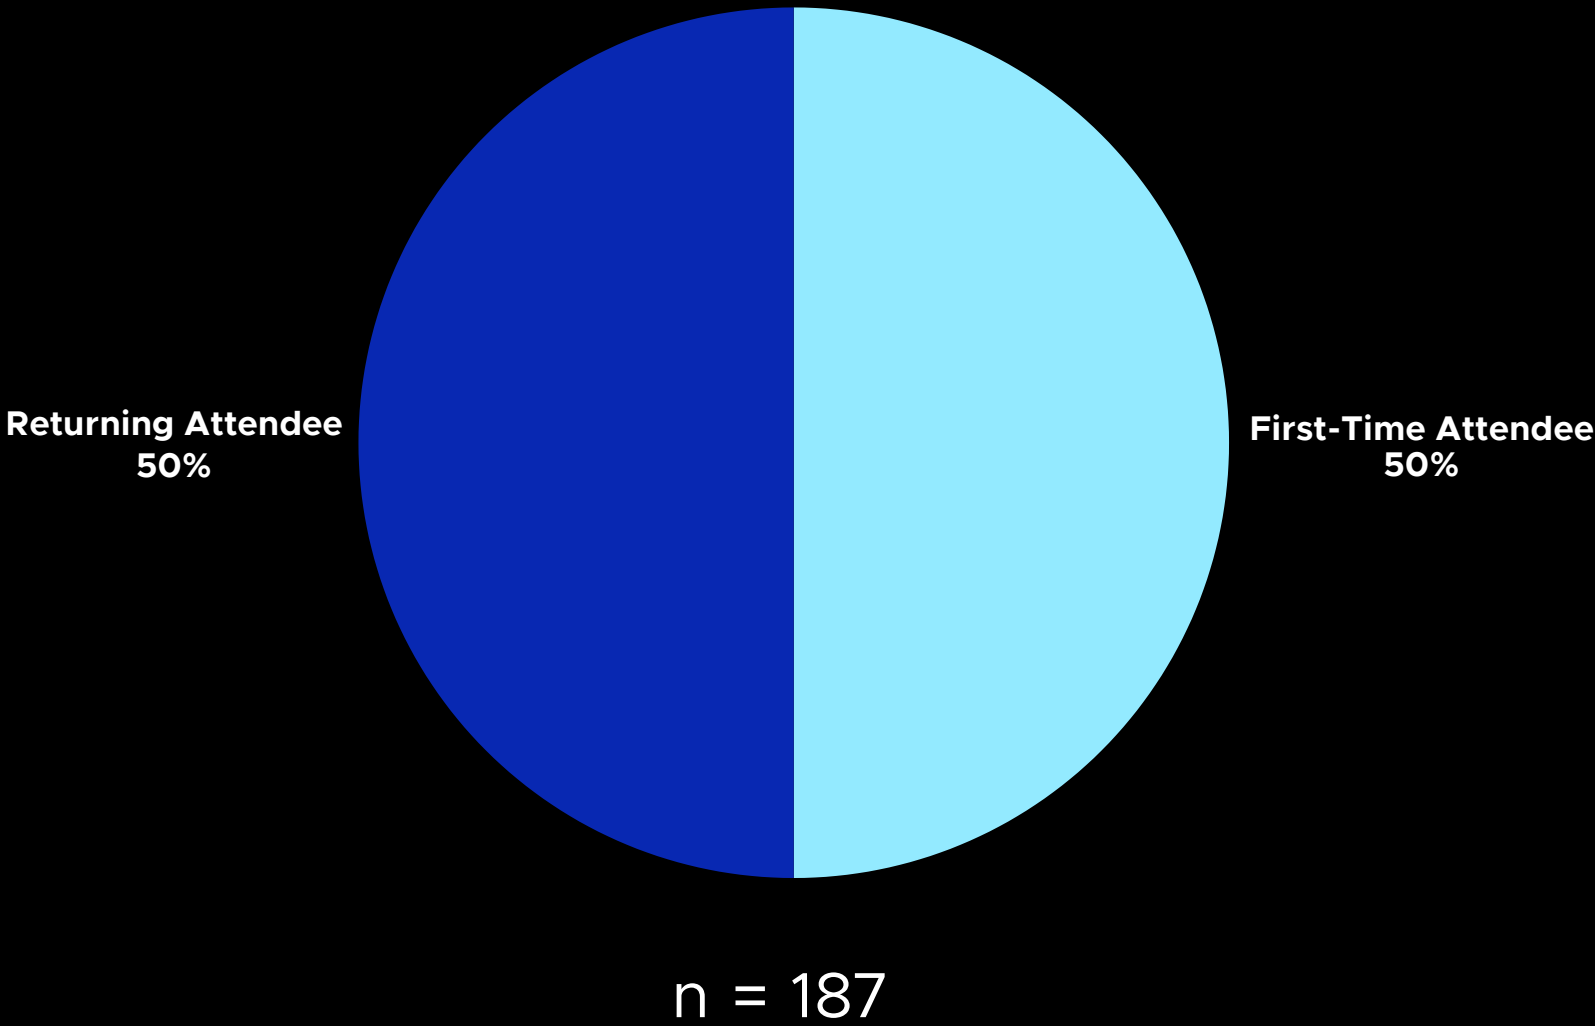

From the following statistics of the attendees, we can see that our audience is very technical and they really seek for new ideas and practical examples that they can use in their day to day job rather than hearing sales pitches.

Number of registrations

265
ATTENDEES

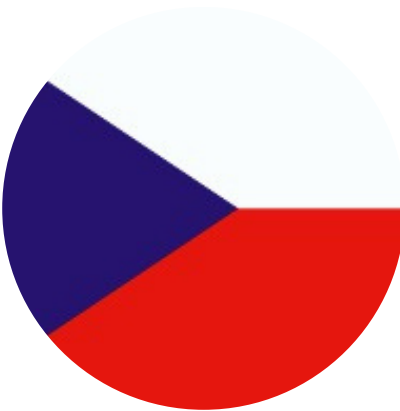

Our event welcomed a balanced audience this year, with 50% first-time attendees and 50% returning attendees. This even split ensures a nice mix of fresh perspectives and ongoing engagement, adding value to our discussions.

ORGANIZATIONS

We were thrilled to see the diverse representation of organization types at our event, ranging from vendors to end-users and consulting firms.

The wide range of attendees reflects the growing interest and adoption of cloud-native digital infrastructures and Kubernetes across different sectors of the industry.

Important note: This data represents only a fraction of our attendees, as we collected this information from just 207 participants.
