KCD WARSAW 2025

TRANSPARENCY REPORT

FOREWORD

KCD Warsaw fresh start

KCD Warsaw 2025 was the first and largest CNCF cloud native event held in Poland on October 9, 2025, at Varso Tower in the heart of Warsaw. The one-day technical conference gathered over 200 developers, system engineers, and IT professionals who immersed themselves in the Kubernetes and Cloud Native community. The event featured insightful talks from industry experts, valuable networking opportunities, and focused on the latest trends in cloud native technologies. The event provided a unique chance for attendees to connect, learn, and innovate.

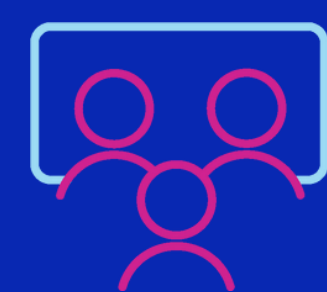

PEOPLE & SESSIONS

Renowned speakers from all around the world delved into cutting-edge advancements in cloud-native digital infrastructures and the widespread adoption of Kubernetes, drawing in over 200 eager attendees.

KCD Warsaw -- what an EPIC start to my **#kcd** community journey! I'm so happy it began there. The vibes were incredibly supportive and thriving all around. Must confess, I was nervous because my topic is pretty niche, but to my immense happiness, the room was packed! 🎉 And even more pleasing, we had such interesting discussions on Q&A and at the after party (best place to have discussions in my humble opinion)

A massive thanks to the wonderful organizing team for having me, and huge kudos to my fellow speakers. All the talks were awesome and so much fun to attend.

I'm not sure I'll be able to tag everyone I had the pleasure of talking to, but I'll do my best. Thanks again, and I hope to see you all soon!

Tomasz Cholewa **Katarzyna Brzozowska** **Wojciech Kocjan** **Alp Eren Celik** **Katarzyna Ł.** **Juliano Costa** **Josh Lee** **Jos van Schouten** **Patrycja Wegrzynowicz** **Karol Szwaj** **Dotan Horovits** **Open Source Summit** **Adriana Villela** **Daniel Pacak** **Juho Syrjänen** and many, many more. Thanks for making **#kcd** warsaw such an incredible experience!

p.s. Slides for my presentation, you may find: <https://lnkd.in/gnNmiVDe>

A couple weeks ago I had a blast presenting "The Infinite Hotel: Scaling Multi-Tenant Platforms through a Unified API" for the last time at **KCD Warsaw**.

I just wanted to thank the event organizers for the opportunity, as well as all the attendees who joined the talk!

Thanks also to my dear friend **Andrzej Kaczyński** for showing me around Warsaw and for sharing his culture and cuisine.

Two weeks ago, I had the amazing opportunity to speak at **KCD Warsaw**, my first time ever presenting at a Kubernetes Community Days event! 🗣️

I delivered a talk on Multi-Scheduler Kubernetes, diving into how multiple schedulers can improve workload management, flexibility, and governance in complex environments using schedulers.

It was such an incredible experience, from the engaged audience, to the fantastic organisers, speakers' dinner, and after-party that made the whole event even more memorable.

A huge thank-you to the KCD Warsaw organizers, fellow speakers, and everyone who attended my session. Your energy and curiosity made it truly special! 🙌❤️

😬 Caught on camera 😬

Earlier this month, at **KCD Warsaw**, I shamelessly used my keynote to rant about the current definition of **#observability**, and to share my own definition.

Apparently I was caught on camera in the act 😬

I also ranted about other common misconceptions, and said what I've been saying for years now:

observability is about data analytics!

What does it mean? What's the new definition?

👉 <https://lnkd.in/d6vV-V2w>

Thanks for letting me rant on stage, and for the cool photo (and event!)

Last week, the **monday.com engineering** Team attended **KCD Warsaw 2025** - the first **Cloud Native Computing Foundation (CNCF)** event in Poland.

An inspiring day filled with great sessions and conversations within the **Cloud Native Warsaw** community!

Proud to be there with the **monday.com** team represented by **Martyna Chruska, Michał Plebański, Kuba Kolybacz, Piotr Korlaga, Karol Szpakowski, Arina Turonchik, Jacek Płonka** 🙌

Good ways to start unwinding after a couple of months on sabbatical? Attending the **KCD Warsaw** yesterday was definitely one of them!

You've got to wonder though - was it **#Kubernetes** or **#OpenTelemetry** Community Day already? 🙌🚀😄

Awesome presentations and tons of great discussions 🙌
It's a community I'm proud to be part of 🙌

Huge thanks to the organizers, and see you at the next one!

On stage at **KCD Warsaw**, **Riccardo Freschi** of AWS is talking about the KEDA project by the **Cloud Native Computing Foundation (CNCF)**.

Interestingly enough, I just had a fascinating episode on KEDA with the project co-creator **Yaron Schneider**, on latest episode of **OpenObservability Talks**:
