KCD NIGERIA 2025

TRANSPARENCY REPORT

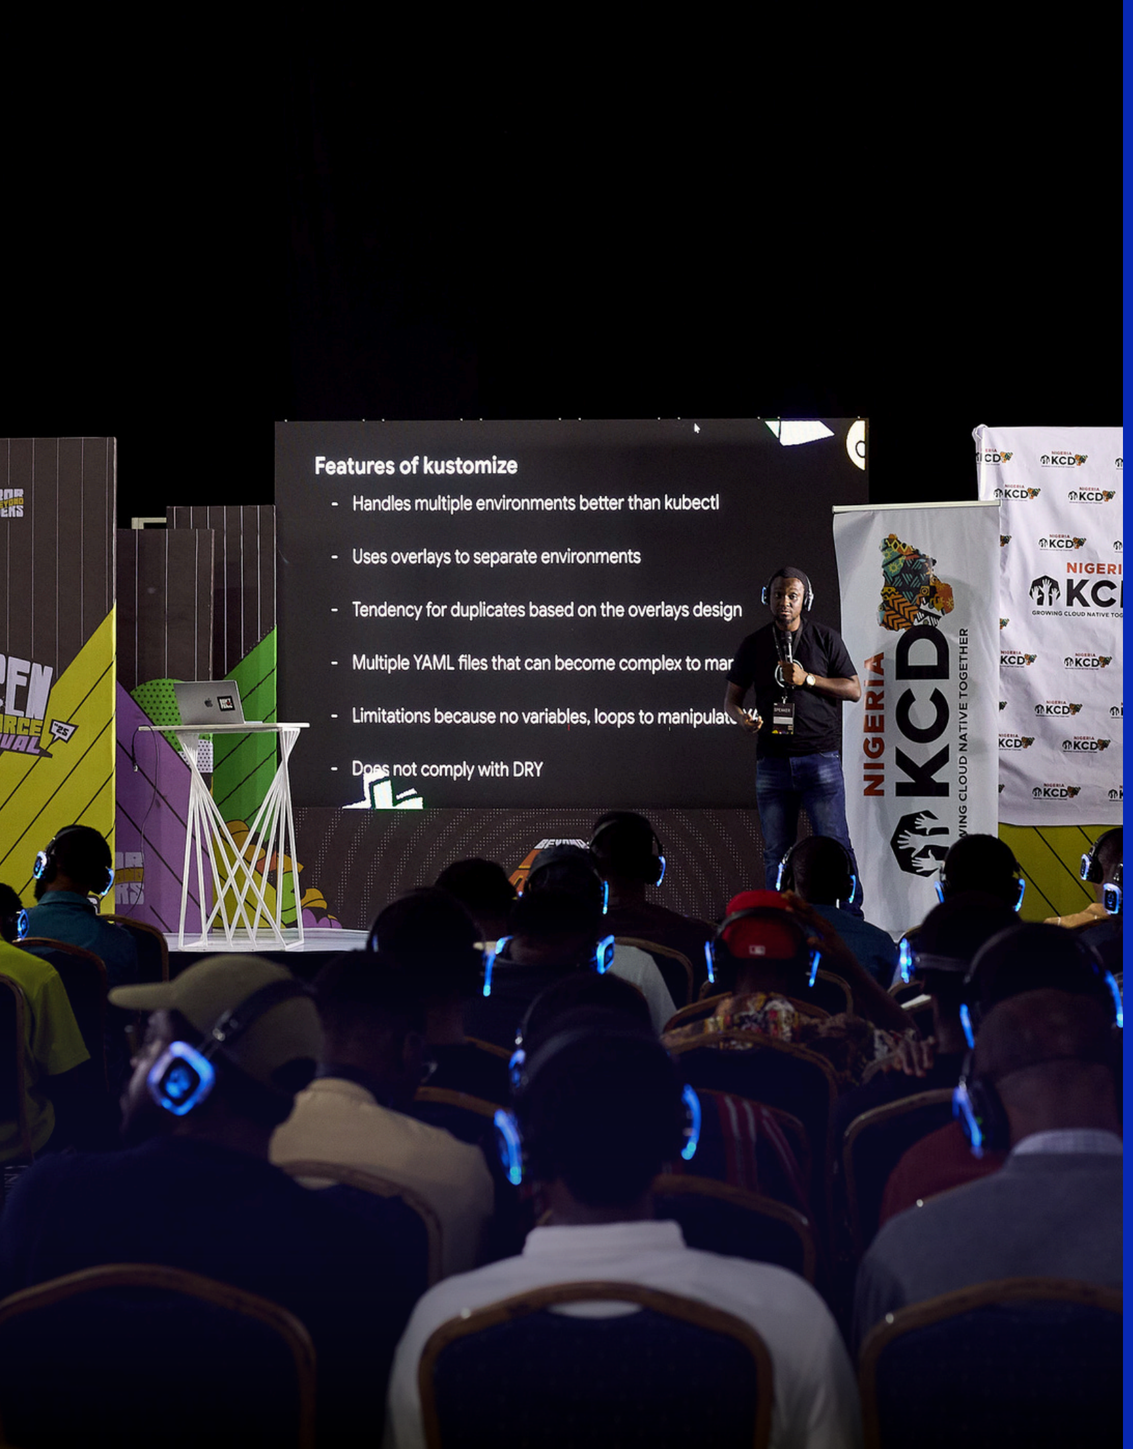
FOREWORD

KCD Nigeria kicks off strong!

On August 15, 2025, we hosted the third edition of Kubernetes Community Days Nigeria (formerly KCD Africa) as a co-located track at OSCA Fest 2025, bringing together 465 attendees for Cloud & Containers (KCD Nigeria) from a total of 1287 registrants.

The event featured 11 speakers and 10 sessions, including dedicated spaces for workshops, lightning talks, and full presentations.

KCD Nigeria 2025 demonstrated the region's maturing cloud-native community through high-quality technical sessions and local case studies. Panels on community building and the Kubestronaut program successfully drove engagement and open discussion among attendees.



SPEAKERS & SESSIONS

The event drew over 465 attendees for the Cloud & Containers (KCD Nigeria) and featured international experts sharing insights on cloud-native technology and the growth of Kubernetes

KCD NIGERIA ON LINKEDIN

This is phenomenal ! Bringing together such diverse communities to create Africa's biggest open source tech conference is no small feat. Kudos to you and the entire team for the dedication, sacrifice, and impact from organizing to speaking and even serving. Your passion for building Africa's Cloud Native ecosystem is truly inspiring. More wins ahead for the community!

Oshaba Samson

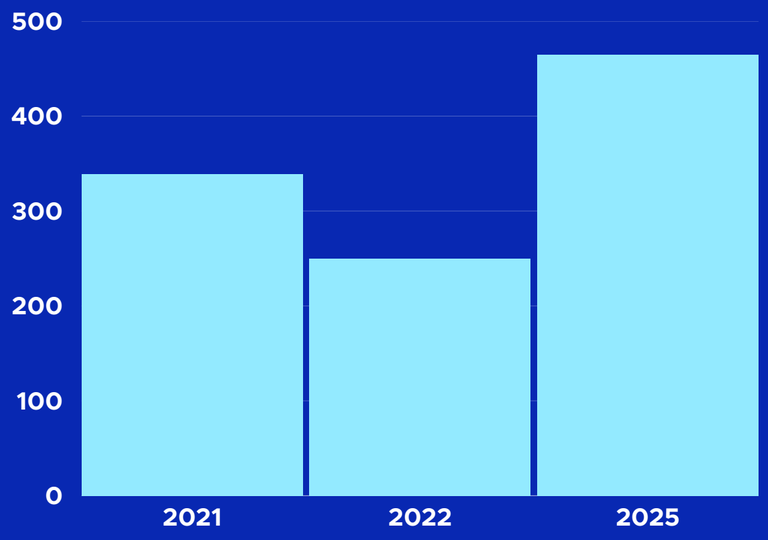
This was honestly an experience I won't forget in a minute. Had so much fun and learned a lot! Thanks, @Ileriayo, for setting this up!

Osinachi Okpara

STATISTICS

It is truly amazing to see how much we've grown since we started in 2022. Despite being away for two years, our community has returned stronger than ever, nearly doubling in size. We are incredibly proud to foster a space for valuable insights and connection, especially as we welcome a fresh wave of first-time participants into the cloud-native community in Nigeria

YEAR TO YEAR GROWTH



86%

GROWTH FROM LAST EVENT

An exciting 60% of our 465 attendees were first-time conference goers, adding to the excitement and fresh perspectives brought to our discussions.
