OpenInfra DAYS Korea

FOREWORD

Three communities, one stage

On September 1, 2026, Kubernetes Korea Group, Korea Ceph User Group and OpenInfra Korea User Group came together at the Kim Koo Museum & Library in Seoul for KCD x Ceph x OpenInfra Day Korea 2026.

325 engineers, architects and students joined a full day of talks on AI infrastructure, Kubernetes, OpenStack and Ceph storage, from bare metal all the way up to AI inference.

The lines between infrastructure, storage and orchestration keep getting thinner. Sharing one stage helped all three communities learn from each other.
