KCD INDONESIA 2026

TRANSPARENCY REPORT

FOREWORD

Fourth KCD in Indonesia and the first ever held in Bandung.

The cloud native community is not only vibrant in the capital city of Jakarta, but also in Bandung. This is clearly reflected in the enthusiasm of the participants who joined the event, demonstrating the strong and growing interest in cloud native technologies across Indonesia.

A week ago, I volunteered at Kubernetes Community Days Indonesia 2026 in Bandung. I went in expecting to help out, and came back with way more than I gave. 🚀
Here's what stuck with me:

1. Cloud native is bigger than Kubernetes itself.
I came in thinking of Kubernetes as the main topic. The talks showed me it's an entire ecosystem: observability, tooling for managing fleets of services, and the practices that keep systems reliable in production. Hearing practitioners explain the problems they actually deal with made concepts I'd only seen in coursework feel real.

2. The community is the best part.
Some of the best moments happened between sessions. Engineers, speakers, and fellow students were open to talking, sharing what they're building, and answering questions from someone still learning. You don't need to be an expert to join the conversation, you just need to show up.

3. Great events don't happen by accident.
Seeing a community-run conference come together from behind the scenes showed me how much coordination, care, and teamwork goes into a single day. Everyone gave their time because they believe in learning together.

Next, I want to go deeper into cloud native hands-on and stay more involved in the local tech community.

Thank you to Kubernetes Community Days Indonesia,, the organizers, and my fellow volunteers for making the day happen. If you're curious about cloud native, I'd say go for it. 🙌

A little late to post this, but **Kubernetes Community Days Indonesia** 2026 is still on my mind two weeks later 🚀

This time I went with my fellow SREs from **GDP Labs**, which made it even more fun. Events like this are always a great chance to learn new things, hear from insightful speakers, and connect with people from the community. It's refreshing to step outside the day-to-day work and see how others are approaching the same challenges we face.

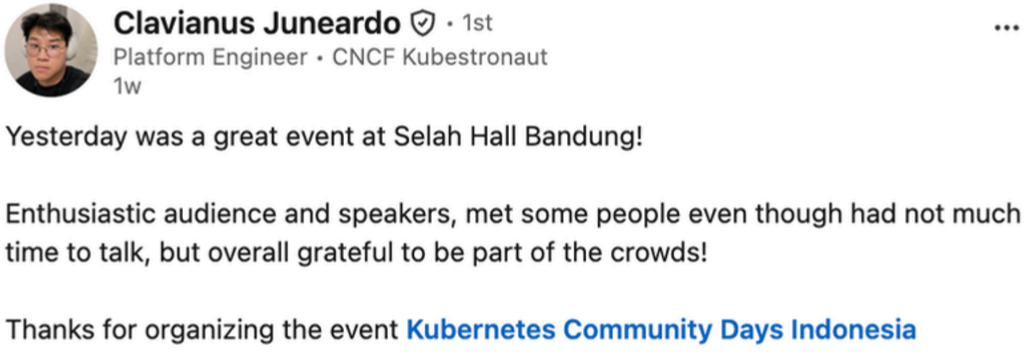

Some of the sessions I found most interesting were on tackling infrastructure drift with Formae, using machine learning on Prometheus metrics to rightsize workloads, and managing cloud infrastructure through Kubernetes with Crossplane. I came home with plenty of ideas to explore further.

Big thanks to the organizers, speakers, and everyone I got to chat with. Looking forward to the next one!

Yesterday was a great event at Selah Hall Bandung!

Enthusiastic audience and speakers, met some people even though had not much time to talk, but overall grateful to be part of the crowds!

Thanks for organizing the event **Kubernetes Community Days Indonesia**

STATISTICS

Kubernetes Community Days (KCD) Indonesia 2026 marked the fourth KCD in Indonesia and the first ever held in Bandung. The cloud native community came together from across Indonesia and beyond, many of them experiencing a KCD for the first time. The community is not only active in the capital city of Jakarta, but also highly enthusiastic in Bandung, as seen from the energy and engagement throughout the event.

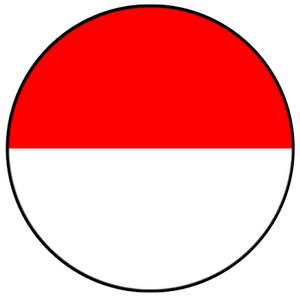

Attendees travelled from various cities across Indonesia, including Jakarta, Bandung, Surabaya, Yogyakarta, and beyond, joined by guests from other countries in the region. The audience skewed heavily toward practitioners: DevOps engineers, SREs, developers, and architects.

An exciting 70% of our attendees were first-time KCD goers, adding to the excitement and energy brought throughout the conference.

ORGANIZATIONS

We were thrilled to see the diverse representation of organization types at our event, ranging from end-users to consulting firms and vendors.

The wide range of attendees reflects the growing interest and adoption of cloud-native digital infrastructures and Kubernetes across different sectors of the industry.

WHAT ATTENDEES SAID

> "Kubernetes Community Days Indonesia 2026 was a blast, community has been more than welcoming and supportive"

> I may not have won a prize, but I came home with something just as valuable: new knowledge, meaningful connections, and fresh motivation to keep learning.
